ULTRASONIC THICKNESS GAUGING

We are proud to mention here that we are the “pioneer” in this field of **Ultrasonic Thickness Gauging** having started this activity in this region way back in 1990. Today, We are one of the leading UT Gauging firms in the United Arab Emirates & also in India.

We are approved by most of the MAJOR CLASSIFICATION BODIES like **NKK, LRS, DNV, BV, ABS, IRS** etc... and have been carrying out UT Gauging of ship structures and pipes since over 20 years now. Due to our long standing business relationship, **some of the major ship owners have now entered into an ANNUAL CONTRACT** with us to carry out UT Gauging for their ships as and when the need arises.

Over these years, we have been entrusted by many major ship owners/managers – not only from UAE but also from many other countries, to carry out UT Gauging onboard their ships.

Do register us in the records of your company and contact us as and when any such need arises in future for UT Gauging work.
